

# Digital Picture Frame

## Skylight

### What Does It Do?

The Skylight digital picture frame allows you to email photos to the frame's unique email address. Once these are emailed, they automatically appear on the screen. The screen will also send a visual alert when new photos are received, and the heart reaction button in the bottom right corner allows you to love photos when they are sent to your frame. The screen continues to automatically rotate through all of your received photos.

### How Do I Use It?

1. Set up: Plug in and tap the screen to connect to Wi-Fi.
2. Email photos to your Skylight frame in seconds: Everyone can send to your Skylight's unique email from their phone or computer, and photos arrive in seconds.
3. Easy-to-use touch screen display: Swipe through photos, browse the gallery, delete photos, or pause the slideshow - all with just one tap
4. Alerts when you get new photos: An alert pops up on the touchscreen whenever you get new photos - just tap to see them
5. The "Heart" button: You can let a loved one know you loved a photo by tapping the heart button. Skylight then emails them to let them know.

### How Can It Help Me?

Impairment/Difficulty	How Device/Feature Can Help	What To Do
Memory	<ul style="list-style-type: none"> <li>● Pictures of loved ones/special locations</li> <li>● Option to add photos outlining routines/posting reminders</li> </ul>	<ul style="list-style-type: none"> <li>● Send photos to a loved one with dementia or another memory impairment <ul style="list-style-type: none"> <li>○ Offers reminders of important people and places always available in the home</li> <li>○ Can encourage a calming effect</li> </ul> </li> <li>● Create a photo that outlines a routine or a reminder (E.g., steps to a morning routine, reminder to take medicine) and send to the frame <ul style="list-style-type: none"> <li>○ Note: if you want this to always be visible instead of a rotating photo, must be the only photo on the frame</li> </ul> </li> </ul>
Social Isolation	<ul style="list-style-type: none"> <li>● Pictures of loved ones/special</li> </ul>	<ul style="list-style-type: none"> <li>● Can send photos to homebound or</li> </ul>

	<p>locations</p> <ul style="list-style-type: none"><li>• Option to send photos from anywhere</li></ul>	<p>distanced loved ones to allow them to feel connected</p> <ul style="list-style-type: none"><li>• Do not have to be physically present to send photos, can be done from anywhere through the frame's personalized email</li></ul>
--	--	---

## What Else Do I Need To Know?

Although the Skylight frame does not require Wi-Fi for you to be able to see photos, it does require Wi-Fi to receive new ones. If you or your loved one does not have permanent Wi-Fi, you can use a mobile hotspot to download new photos or for the initial frame set up. Any photos that are sent to Skylight while it is disconnected will queue for download until it is connected again.
